DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows amendment on 03/09/06:

Claim 1 in line 11, the "he" delete and replaced by -the--.

Response to Amendment

Applicant's response to amendment filed on 03/09/06 has been entered. It is noted that the application contains claims 1-14 and 16-24 and claim 15 has been canceled by the amendment on 03/09/06.

Allowable Subject Matter

Claims 1-14 and 16-24 are allowed.

As independent claim 1 is allowed overcome the prior art of record, taken alone or in combination, fails discloses or render a single sensor actuation system comprising all the specific elements with the specific combination including of at least one detectable element that is permanently located in a fixed position on the belt and sensed by the sensor when said detectable element is aligned with the emitted signal of the sensor and generates the reflected signal, and the sensor retrieving the reflected signal from said detectable element and sending the sensor return signal to a motor driving the belt to stop driving the belt in response to the retrieving when the at least one

detectable element is aligned with the emitted signal of the sensor, and the AC inverter sends sending a signal to an actuator of the platen to bring the platen down to press a tortilla when the belt has stopped moving in combination with the rest of the limitation of claim 1.

As independent claim 13 is allowed overcome the prior art of record, taken alone or in combination, fails discloses or render a method of actuating a second part of a tortilla machine comprising all the specific elements with the specific combination including of retrieving a returned signal from the detectable element and sending the returned signal from the sensor to an AC inverter when the first position is detected by the sensor, slowing the first part of the machine by a signal from the inverter to a drive of the first part, stopping the first part of the machine at a predetermined second position different from the first position, and actuating the second part of the machine when a signal from the drive of the first part of the machine goes to a zero frequency in combination with the rest of the limitation of claim 13.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Sang Nguyen whose telephone number (571)-272-2425. The Examiner can normally be reached on Monday through Friday From 9:30 AM to 6:30 PM.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's Supervisor, Gregory J. Toatley, Jr., can be reached on (571) 272-2800 ext. 77. The fax number for the organization where this application or proceeding is assigned is (703) 872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
